The rational choice

With the 1992 elections just around the corner, the issue of rational choice has become a hot topic. The issue is not new, but it is becoming more and more relevant as the country moves towards a new political system.

The issue of rational choice is a complex one. It involves the question of whether or not a person can make a rational choice between two or more alternatives. In the context of the 1992 elections, the issue is whether or not a voter can make a rational choice between the two main candidates, the incumbent president and the challenger.

Firm staves off power cutoff via SC appeal

By Miguel A. Lozano
A power company has filed an appeal with the Supreme Court to prevent the government from cutting off electricity to a large industrial complex in the city of Manila. The company, which is a subsidiary of a major power utility, claims that the government's action is unconstitutional and that it would cause significant economic damage to the city. Figure 1 consists of four line graphs arranged in a 2x2 grid, showing the effect of temperature on the rate of reaction for the reaction of calcium carbonate with hydrochloric acid. Each graph plots 'Volume of gas (cm³)' on the y-axis (0 to 100) against 'Time (min)' on the x-axis (0 to 10). The graphs are labeled with temperatures: 10°C (top-left), 20°C (top-right), 30°C (bottom-left), and 40°C (bottom-right). The curves show an initial rapid increase in gas volume that levels off over time. Higher temperatures result in a faster rate of reaction, reaching a higher volume of gas more quickly.

Intox-detox' What to do after the party

After a night of partying, you may feel like you've entered a whole new world. Or, at least, you might feel like you've experienced a whole new world. But in reality, you're just in a state of "hangover" or "hangover."

'Provinciana' hits it big in the city, somehow

By Anne S. Johnson

WELCOME TO THE NEW WORLD
